[Easy Outlook Express Repair Serial 129](#)

Methodology

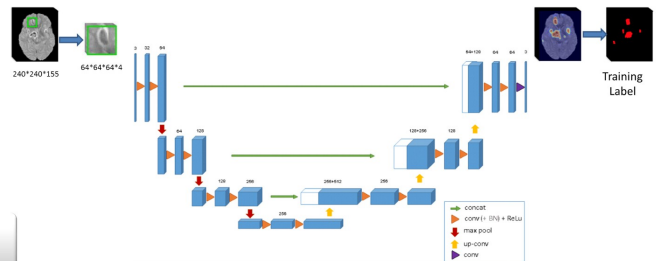

Resampling and skull stripping: with pipeline developed at Martinos Imaging Centre, Harvard Medical School, USA

Preprocessing: Channel Normalization (zero mean unit variance), Bias field correction using N4ITK Tool

3D Patch Extraction for Training: 64*64*64 size patches were extracted from BRATS18 dataset with labels

Deep learning Pipeline and Post processing: Morphological operation and connected component analysis for FP removal

Radiomic features: Radiomic features were extracted from segmented tumor. After a four-step feature selection method, most robust, non-redundant and predictive features were selected.

Results

Edema Enhancing tumor Tumor core
